Press-release

06 October 2021

New cars sales increased by 15,1% in Q1-3 of the year and decreased by 22,6% in September 2021

In Q1-3 of 2021, sales of new cars and light commercial vehicles in Russia **increased by 15,1 %** compared to the same period in 2020 or by **11 196** sold units, and amounted to **1 260 111** cars, according to the AEB Automobile Manufacturers Committee (AEB AMC).

Among them:

- LCVs – 91 505 pcs. or 7,3%
- SUVs – 587 176 pcs. or 46,6%
- Pick-ups – 7 159 pcs. or 0,6%
- BEV (Battery Electric vehicles) – 797 pcs.

In September 2021, sales of new cars and light commercial vehicles in Russia **decreased by 22,6%** compared to **September 2020** or by 34 924 sold units, and amounted to **119 485** cars, according to the AEB Automobile Manufacturers Committee (AEB AMC).

Dr. Thomas Staertzel, Chairman of the AEB Automobile Manufacturers Committee commented:

“In September 2021 only 119 485 new cars and LCV’s were sold which demonstrates the market decrease at the level of -22,6%. As expected, the negative trend continues, although 3 quarters 2021 result still shows a 15,1% vs. same period 2020 with 1 260 111 sold new cars and LCV’s. The known strong car deficit in the market, linked to production shortage and the worldwide semi-conductor problem as well as other new disturbing influencers like energy crisis in China and Great Britain, rise of raw material cost and others will support the negative trend also during the next months. The market situation is very uncertain at the moment, but the AMC will try to revise its market forecast 2021 in November”.

Note:

Monthly AEB data does not include sales figures from BMW and Mercedes-Benz Rus, following BMW Group and Mercedes-Benz AG decisions to change the frequency of their sales data publication from a monthly to a quarterly basis.

The Q1-3 market results tables contain data on all brands, including BMW, MINI Mercedes-Benz, smart, Mercedes-Benz Vans brands.
